## BIBLIOGRAPHY OF AGRICULTURE

Vol. 28

July 1964

No. 7

The Bibliography of Agriculture is an index to the literature of agriculture and the allied sciences received in the National Agricultural Library. Publications from any country are indexed, provided they are in one of the languages shown in CAPITALS at bottom of this column, or have summaries or abstracts in one of those languages.

Literature received more than one year after publication is generally not indexed. Exceptions are made for important scientific publications.

Indexing of articles on the processing of agricultural products is limited to those on primary processing.

Unsigned articles and those signed with pseudonyms or initials, editorials, letters to the editor, and columns appearing regularly, are omitted.

### FORMAT

The Bibliography is a classified arrangement of references under the following subjects:

Plant Science  
Soils and Fertilizers  
Forestry  
Animal Industry  
Entomology  
Agricultural Engineering  
Agricultural Products  
Agricultural Economics and  
Rural Sociology  
Food and Human Nutrition  
Miscellaneous

The classified section is followed by the listing of:

New Periodicals and Serials  
Translations  
USDA Publications  
State Agricultural Experiment  
Station Publications  
State Agricultural Extension  
Service Publications  
Food and Agriculture Organization  
of the UN (FAO) Publications

The last section of each monthly issue is the Personal and Organizational index for that issue.

Foreign language titles of articles in serial publications are given in English only. The language of the text is shown in abbreviated form in parentheses at the end of the title. The following notations are used:
